Employment History

Current - Web Developer - Start Date: May 15, 2017

Company: Fathead LLC (fathead.com) Location: Detroit, MI

- Primary developer in charge of website's main CSS and Javascript, including making updates, improvements, and maintaining version control using Git.
- Adding new functionality to the website to improve user experience, using Javascript, CSS, and Vue.js.
- Development of site's navigation, ensuring responsiveness as well as desired functionality and styling, based on requirements from marketing team.
- Creating wireframes and designs for new site features, and presenting options to upper management.
- Making improvements to the development process, creating better workflows and version control systems.

September 2016 - May 2017 - UI/UX Developer

Company: Jackson Dawson (jacksondawson.com) Location: Dearborn, MI

- Design and development of public facing sites for major clients, such as Lincoln, Ford, and Honda.
- Use of Adobe Photoshop and Illustrator to create site designs, including custom graphics.
- Development of sites based on given, or self-created designs using Bootstrap and Wordpress.
- Extensive use of HTML, CSS, Javascript, and JQuery in the development process of websites.

May 2015 – September 2016: Front End Developer

Company: Lexika Inc. (deepgram.com) Location: San Francisco, CA

- Worked remotely on an as needed basis using HTML, CSS, JavaScript, and JQuery extensively.
- Developed front end of website to demonstrate company's API product to venture capitalist investors.

Hobbies, Interests & Volunteering

I love running, being outside, and playing video games in my free time. I love technology, and am always interested to hear about new ideas, products, and software. I also enjoy movies, reading, and going camping.

I have participated in several hackathons during my time as a developer. I participated in [MHacks](#) 2015 at The University of Michigan, as well as Local Hack day of the same year. At [Spartahack](#), MSU's hackathon, I participated in the event, as well as volunteered to direct other students in their pursuit of projects.

I was a member of MSU's Design for America studio, which is one of the many student-led studios across the country that aim to use design to solve problems in their local communities.
